

THE KEY COMPONENT TO CONCRETE COATING SUCCESS

S-1300 PENE-KRETE® AND
S-1400 PENE-KRETE® ADDITIVE™

STOPS EFFLORESCENCE

WATERPROOFS
CONCRETE

**PENE-KRETE AND PENE-KRETE ADDITIVE REACT TO FORM AN
INTERNAL CRYSTALLINE STRUCTURE THROUGHOUT THE
CONCRETE PORES AND MINOR CRACKS.**

- Waterproof
- Moisture & Water Vapor Control
- Increases Compressive Strength
- Freeze/Thaw Protection & Resistance
- Resists Salt Damage
- Densifier & Hardener
- Retards Dusting
- Stops Efflorescence
- Provides Internal Chemical Encapsulation & Expels Excess Chemicals
- Extends Coating Life
- Increases Strength and Durability
- Increases Abrasion Resistance
- Reduces Shrinkage Cracks
- Increases Workability
- Slows Down Curing Acceleration
- Stops Radon Intrusion
- Salt Resistance
- Salt Treatment Protection
- Increases coating life up to 300%
- Inexpensive – Added Insurance!

**SPRAY APPLIED TO NEW OR EXISTING CONCRETE – OR
USED AS AN ADMIXTURE IN NEW POURS.**

the Field for over 15 Years”***

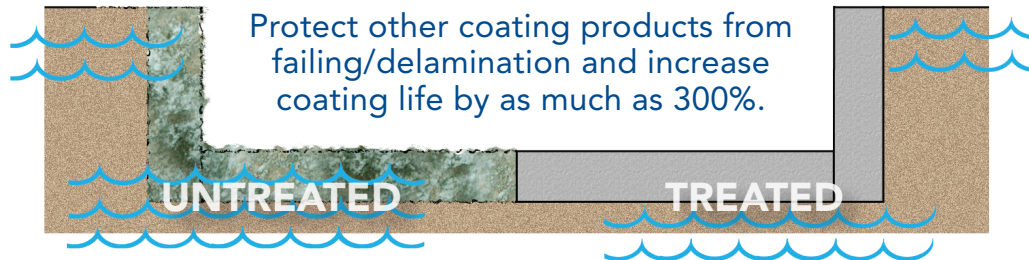

S-1300 PENE-KRETE® AND S-1400 PENE-KRETE® ADDITIVE™

**SPRAY APPLIED TO
NEW OR EXISTING
CONCRETE – OR USED
AS AN ADMIXTURE IN
NEW POURS.**

PENE-KRETE™

For all Portland cement-based substrates including all concrete, masonry, stucco, precast concrete & structural concrete.

Pene-Krete and Pene-Krete Additive both increase the durability of all Portland cement-based materials.

An integral part of all Super-Krete systems, Pene-Krete is the key component to coating success! Using Pene-Krete as a substrate treatment properly prepares the concrete for virtually any type of coating.

Refer to Super-Krete's S-1300 and S-1400 Technical Data Sheets and the S-10,000 Moisture Vapor Emissions Treatment Specification for application instruction and detailed information.

For Professional Use Only. NOT for sale to or use by the general public.

©2012 Super-Krete International, Inc. Super-Krete, Pene-Krete and the Super-Krete products logo are all federally registered trademarks of Super-Krete International, Inc.

Coverage Rates:

S-1300 Pene-Krete (spray on): Approx. 300 sf/gal
S-1400 Pene-Krete Additive: 14 oz / cubic yard of concrete
