

# **GLO-KOTE™**

## **GLOW-IN-THE-DARK 1/8"**

### **CONCRETE OVERLAY**

#### **READY-MIX FORMULA (JUST ADD WATER!)**

**GLO-KOTE IS A PHOTO-LUMINESCENT AGGREGATE AND SPECIAL POLYMER BLEND THAT ABSORBS ULTRA VIOLET RAYS TO PRODUCE A REFLECTIVE "GLOWING" SURFACE AT NIGHT.**

Charged by natural sunlight or most light sources  
Yields up to 12 hours of "glow" with only 20 minutes of exposure

- Full depth glow
- No chemical reactions
- Non-toxic
- No bonding agents needed

Ideal for pathways, walkable areas, railroad markings, indoor and outdoor areas for decorative use or for safety egress.

Glo-Kote does not constitute a replacement for lighting fixtures, but it will add value and safety to your project and can significantly reduce energy costs.

**Coverage Rates:**

1 square foot per pound of material at 1/8"  
Available in 5 lb. and 50 lb. units

**EASILY APPLIED BY BRUSH, SPRAYER, SQUEEGEE OR TROWEL**
